

Алгоритмы и Алгоритмические Языки

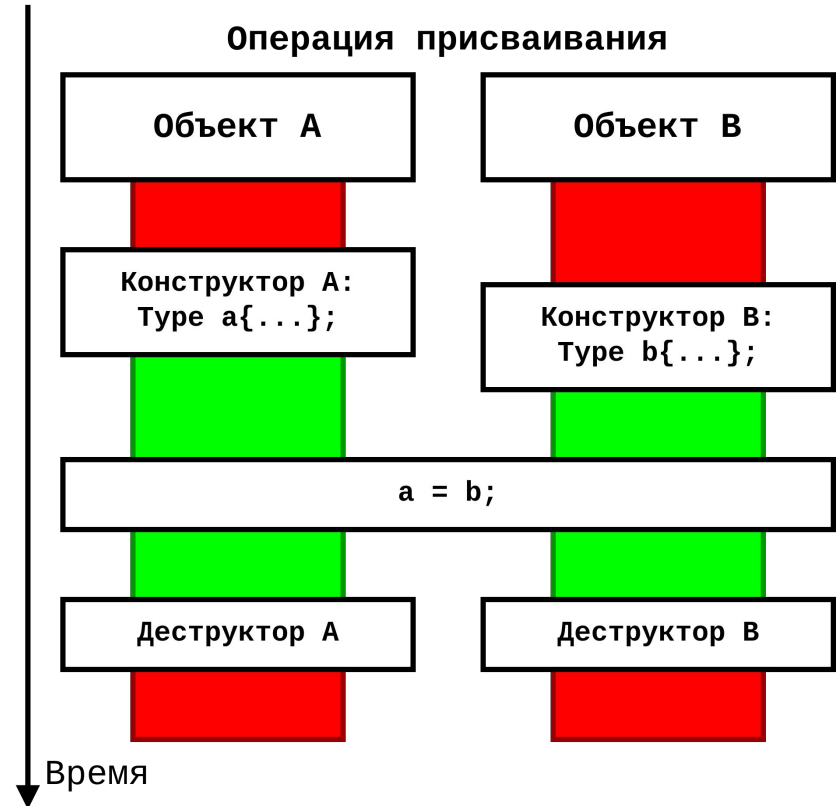

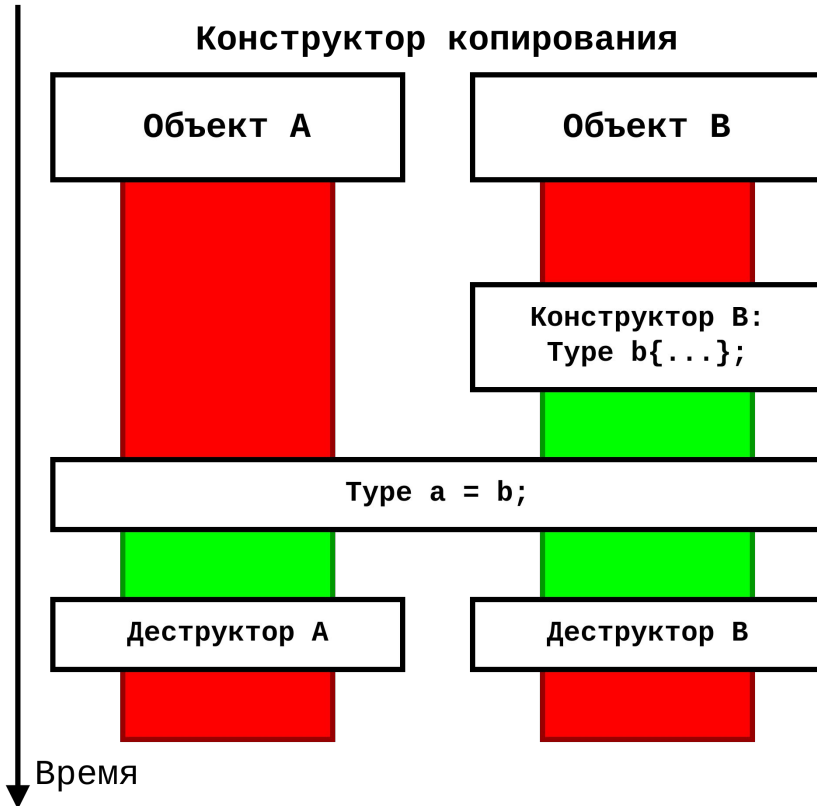

Семинар #22:

1. Семантика перемещения.
2. Пример тестовой системы.
3. Умные указатели: `std::unique_ptr` и `std::shared_ptr`.

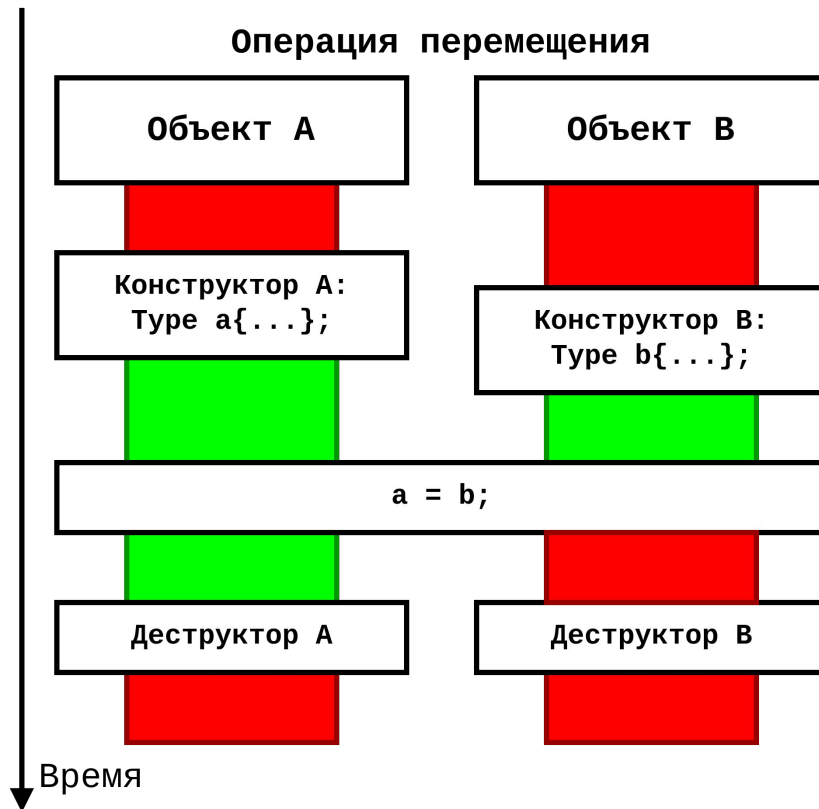

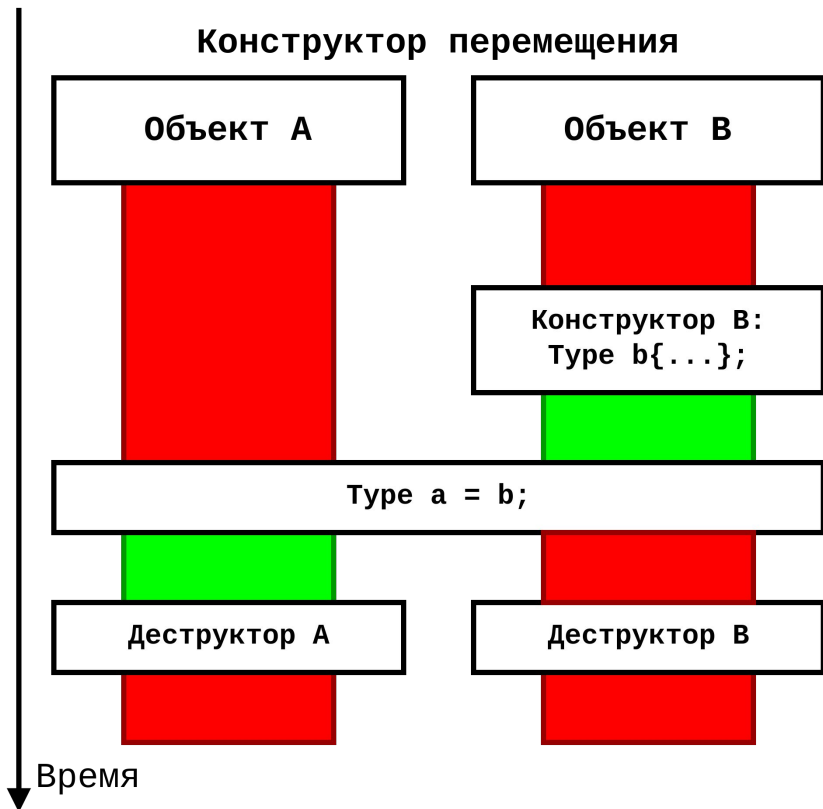

Семантика перемещения

Семантика копирования

Семантика перемещения

Пример тестовой системы

Пример тестовой системы

```
> make run
Running executable
Test Vector operations
Running test      constructor: [OK]
Running test      copy-constructor: [OK]
Running test      move-constructor: [OK]
Running test      copy-assignment: [OK]
Running test      move-assignment: [OK]
Running test      addition: [OK]
Test smart pointer operations
Running test      unique-ptr-copy: [OK]
Running test      shared-ptr-copy: [OK]
```

```
Running executable
Test Vector operations
Running test      constructor: [OK]
Running test      copy-constructor: [OK]
Running test      move-constructor: [OK]
Running test      copy-assignment: [OK]
Running test      move-assignment: [OK]
Running test      addition: [OK]
Test smart pointer operations
Running test      unique-ptr-copy: [OK]
Running test      shared-ptr-copy: [FAIL]
```

```
> make run
Running executable
Test Vector operations
Running test      constructor: [OK]
Running test      copy-constructor: [OK]
Running test      move-constructor: [OK]
Running test      copy-assignment: [OK]
Running test      move-assignment: [OK]
Running test      addition: [OK]
Test smart pointer operations
Running test      unique-ptr-copy: [OK]
Running test      shared-ptr-copy: [ERROR] (killed by signal 11)
```

Умные указатели `shared_ptr` и `unique_ptr`
